

**les
formes**

construire ses
premiers outils pour
structurer sa pensée.

PS

Les formes géométriques rond,
carré, triangle

→ **Reconnaître et nommer le rond, le carré, le triangle, le rectangle.**

→ **Langage nommer et repérer les formes.**

→ **Apprendre à dessiner des formes simple.**

→ **Reconnaître des formes planes et des solides.**

→ **Reproduire une forme ou un assemblage de formes.**

C'est quoi une forme

carré

triangle

rond

rectangle

Une forme géométrique, est une figure quelconque fabriquée à partir de lignes fermées.

La chanson des formes

Monsieur carré a quatre côtés. 

Monsieur rectangle, plus allongé. 

Monsieur Triangle, trois bouts pointus. 

Monsieur Rond commence à
Rouler, rouler, rouler, rouler. 

la forme le carré

Apprend à dessiner un carré

on trouve de carré chez toi à l'école :

la forme le triangle

apprend à dessiner un rond

On trouve de ron chez toi ou à l'école

la forme le rond

apprend à dessiner un rond

On trouve de ron chez toi ou à l'école

la forme le rectangle

Apprend à dessiner un rectangle

On trouve des rectangles chez toi ou à l'école

jeux autour des formes

Ce jeu amusant de formes aidera les enfants à comprendre à quoi ressemble une forme et à les voir dans le monde réel, ce qui rend les mathématiques pertinentes au quotidien! Comprend: instructions, 4 plateaux de jeu de couleur unique et cartes de forme. Vous aurez besoin de marqueurs en quelque sorte (boutons, matériel de manipulation, lego, etc.)

Les formes font leurs cirque

Collage de ronds en papier affiche jaune, rouge, bleu au choix. C'est l'enfant qui choisit combien il veut en coller et où il veut coller ses ronds.

Collage de carrés en papier affiche jaune, rouge, bleu au choix. C'est l'enfant qui choisit combien il veut en coller et où il veut coller ses carrés. Il peut aussi coller des gommettes.

à l'aide de supports plastiques géométriques, pour cette activité nous utiliserons le triangle. Nous allons faire des empreintes associant forme et couleur. Les triangles seront d'une couleur différente.

Nous allons laisser sécher la peinture entre chaque empreinte, afin de créer une oeuvre sur la durée (il va falloir reprendre la peinture à plusieurs reprises). Voilà aussi une manière de temporiser, de prendre son temps, de travailler dans le temps.

Pour réaliser ces empreintes, il faut aussi avoir des gestes techniques.

Nous avons peint les cases créées par le contour des rectangles superposées en faisant attention à ne pas utiliser la même couleur lorsque les cases sont à côté.

Les enfants sont passionnés par tout ce qui roule, et qui commence à s'intéresser aux formes géométriques et à les nommer. L'occasion de préparer ces circuits de différentes formes.

Les circuits sont découpés dans des feuilles de carton noir, je me suis servi d'objets du quotidien pour tracer les formes. Les traits blancs sont faits avec une "souris" de Tipp-Ex. J'ai scotchés les circuits au sol.
